Acknowledgments

We sincerely thank the organizers of Qiskit Fall Fest 2026 for providing us with the opportunity to explore quantum computing and quantum machine learning.

We express our gratitude to our faculty mentors and institution for their guidance and support throughout the development of our project, Q-HEALTH GUARD.

We acknowledge IBM Quantum and the Qiskit community for providing open-source tools and documentation that support our exploration of quantum circuits, quantum kernels, and quantum classification.

Finally, we thank all the members of Team Epic Engineers for their collaboration, contributions, and teamwork in developing this project.

Note: Keep acknowledgments that accurately reflect the support received. These references support the technologies and concepts; they do not establish that the complete system has been implemented or clinically validated.
